

District students more than double state proficiency growth average

The results of the New Mexico PARCC test were received by Gallup-McKinley County Schools in August. The data showed significant growth in student proficiency in test categories like English Language Arts, math and science.

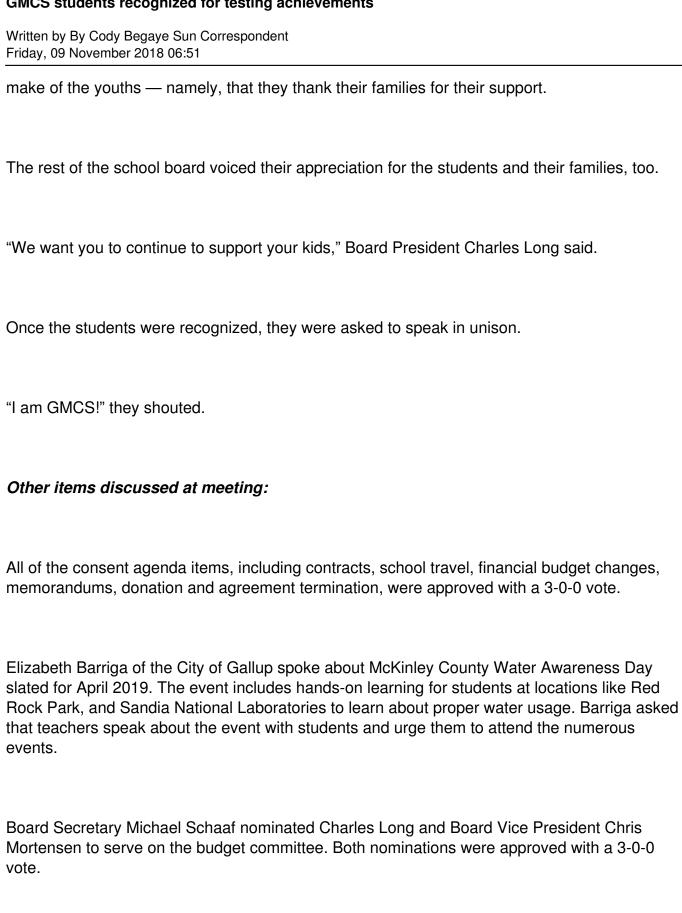

The results also revealed that GMCS was the No. 1 school district in New Mexico when it came to proficiency growth, with students more than doubling the state average.

"This is history for Gallup-McKinley County Schools," GMCS Superintendent Mike Hyatt said during the meeting.

More than 100 students from GMCS were recognized by the school board at the meeting. Each student received a plaque with their name and the test categories in which they exceeded printed on it.

As the students were awarded for their achievements, Hyatt said the board had one request to
