

***On April 6, enjoy a New Moon. This moon doesn't receive the same hype as the Full Moon, but it's just as important. The Full Moon is the pinnacle of a period. The New Moon marks the end. This is the period you should focus on. Madame G recommends that you reevaluate your life and projects. What works and what doesn't? Look deeply and don't be afraid to answer honestly.***

### **Aries** (March 21-April 19)

The Sun is in your house this period. Allow the energy to flow through you and energize you. Now is the time to reevaluate your situation. Are you simply annoyed or is this the wrong path? It's important to finish projects and commitments. However, it's also important to know when to quit. You must learn to balance pushing yourself with knowing what makes you happy.

### **Taurus** (April 20-May 20)

Give yourself time to heal, Taurus, life is not about how much you can endure. Do your best and allow the healing to begin. You're capable of so much more than you ever realized. Crunch numbers, map out a production timeline and determine what resources, human and material, are needed. Mars can motivate you to work harder to raise your bottom line and save up for a big goal.

### **Gemini** (May 21-June 20)

Push yourself to become more than you ever thought you could be. But, first you must ask yourself who you want to be. Don't worry too much about being "something" important. Rather focus on becoming someone of value. What are your values? Do you have integrity? Do you follow through? Can you count on yourself? If you can't, that's where you start. Good luck!

### **Cancer** (June 21-July 22)

Reaching out to an old friend is a valuable experience. Push yourself to look inward and develop a sense of value. You must learn to look within for the answer to life's questions. Everything you need to be happy and live the good life is within your own soul. You must learn to push past the sadness and discomfort before you find the answer. Have courage, dear Cancer, it's important.

### **Leo** (July 23-Aug. 22)

Show no fear, dear Leo. Look within your heart and imagine a better brighter future. You must also acknowledge where you came from and what you'd like to see. Now is the time to develop the skills you never had and become more than you ever imagined. Don't look beyond yourself for the answer to life's questions. Instead turn inward and become aware of your own voice.

### **Virgo** (Aug. 23-Sept. 22)

Don't give up on yourself and those around you. Look deeply into your soul and find peace. Go the extra mile in every work-related thing you do, from pitches and presentations to wooing your dream clients. Just watch that you don't come across too pushy, aggressive, or competitive. Think of everyone as a potential collaborator, and you'll have 'em eating out of your hand.

### **Libra** (Sept. 23-Oct.22)

You're capable of so much more than you'd ever imagine, but you must allow others to find their voices as well. Don't give up on yourself. Push yourself towards a bright future that includes working with others. Show up to your feelings and don't hide away from the scarier parts. You can do so much more than you ever thought, if you give others a chance to shine.

### **Scorpio** (Oct. 23-Nov. 21)

Who are you, dear Scorpio? In order to become who you are, you might need to go to the place that scares you beyond the pale. Don't give up! Look internally and go beyond the fear. Don't get lost in unfulfilled dreams. Either make the change to live the life of your dreams, or accept the life you have. It's important to acknowledge that some things can change and others won't.

### ***Sagittarius*** (Nov. 22-Dec. 21)

You have a bright future, if you're willing to work for it. If you put in the time and become more than you were in the past, you'll get there. But, you must look within and acknowledge that life is worth living. Don't give up on yourself. Even if you're weighed down by guilt, shame and fear. Face those feelings and then do the seemingly impossible—forgive yourself and move on.

### ***Capricorn*** (Dec. 22-Jan. 19)

Resentment is not a feeling worth hanging onto. The only feelings worth sharing with others are love, friendship, empathy, and courage. If you're bogged down by worry, it's time to let it go. Don't blame anyone for how hard it is to let go of these feelings. The only one who can manage your feelings is you. If you feel overwhelmed, it's your fault not anyone else's. Stop the blame.

### ***Aquarius*** (Jan. 20-Feb. 18)

Focus on what you can change and let go of the rest. It's time to live a more fulfilling life and learn from the process. Now you can start thinking about ways to bring in more income, whether from a freelance gig, ongoing side hustle or a new job. But don't wait for that client or boss to find YOU. Be proactive about making this happen.

### ***Pisces*** (Feb. 19-March 20)

Do something that will change your life today. Life is not about how much you can endure and get through. Instead focus on what you can change about yourself and move forward with
