

Today welcomes Cancer's New Moon, as Gemini's steps aside. The Cancer Sun is shining brightly, as of June 21. This really marks the beginning of Summer. You may feel nostalgic and ready for solitude. It's wise to rest and reflect. Collect your thoughts and consider your options. Madame G recommends you pull up YouTube and listen to Lofi live—it supports concentration.

Aries (March 21-April 19)

You're longing for the next step. Is this it? You may not always have the answers and it's not always the right move. However, you can succeed if you put your mind to it. You have the power over your mind, emotions, and tongue. Don't scare yourself with outlandish imaginings. Use your power of concentration for good, help a friend, your spouse, or friend. Stay calm.

Taurus (April 20-May 20)

You're ready! Whatever it is, you're more than ready. The only obstacle at this point is you. You may talk yourself out of it. You may insert the seed of self-doubt so strongly you've named it—Herbert. It's a cute name for a malicious disease. Cut it out. Be ruthless. You're worth it too. You're capable. And greatness is in you. Madame G suggests you wake up and do it.

Gemini (May 21-June 20)

Take these moments of quiet, for rest. Embrace the solitude. It's a gift not a curse. You'll soon be on the hunt for your other half, driven to seek, learn, and discover. You just need a moment to think and pick out the next destination on the globe. Are you headed to Madagascar or Mars? Who knows with you, whatever it is you're going to do it with everything you've got. You can.

Cancer (June 21-July 22)

Use this time to your advantage. You don't need to know everything at this moment. Your task is to sit down and contemplate the pros and cons. What do you really want? Maybe you thought your life was headed down one path and then it rapidly went another way. Don't fret. This is life. You're on the path to discovery and joy. Who knows all the wonders you'll discover. Good luck!

Leo (July 23-Aug. 22)

Life is such an interesting journey. You never know what you'll find. It's never too late to complete the tasks you've always wanted or to be who you've always wanted to be. The charming part—it's all part of the fun. You may meet a chipmunk and a pair of lizards who visit you in the barn. Say, hello! And let them on their way. It's a joy to discover new things. Do it.

Virgo (Aug. 23-Sept. 22)

You're not a wuss. Everyone is afraid to make a fool of themselves. It's hard when you're laughed at. Life hack: if you're afraid of water skiing in front of everyone because you think they'll make fun of you. Just get up and give it your best shot. If you fall, stand up and give a bow. True grace is falling on your ass and standing right back up with aplomb. Take a bow!

Libra (Sept. 23-Oct.22)

You're on the right track. This is certainly a good start. However, the dragon in you may have shouted too loud too often. Eventually even the mice loose fear of the cat with no teeth or claws. And in fact, the sharp points may not be necessary. You may have more allies and friends than you realize. This may get you further to the top than you first imagined. Who knew?!

Scorpio (Oct. 23-Nov. 21)

What's in your heart? You hardly know. You're ready for some adventure. It's hard to know which one is right to choose. What is the right path? There is no right or wrong. You'll make the best decision you can. Live it with all your heart and grasp the next adventure that says: hell yes! with both hands. You'll be so glad you did. You're choosing better problems. Great job!

Sagittarius (Nov. 22-Dec. 21)

Where do you go from here? You may think the only way down is straight, but you may be wrong. You could be spiraling. You may be soaring. It's often hard to tell. Your gut knows. Listen. If your heart is telling you to listen and you keep ignoring it—you'll run into problems. This may all be right and still be all wrong or vice versa. Don't give up. You can do this.

Capricorn (Dec. 22-Jan. 19)

You're heading on an adventure. You may be headed out of town, in a book, or through self-discovery. Whatever it is, take the chance for exploration further. Don't hide behind the way it's always been. Look at yourself anew. What's missing? What would you like? Your heart is speaking to you: listen carefully. It says love yourself, forgive and move on. That's all there is.

Aquarius (Jan. 20-Feb. 18)

Heading to Pie Town? If not why not? You may think life is all about the big adventures and those are great. However, the little ones like taking a small day trip or walking through your yard are full of possibilities. Stop limiting yourself and your dreams. Become more than a predetermined idea. Release the shackles of childhood tyranny and cut loose. Dance!

Pisces (Feb. 19-March 20)

Madame G guide to the stars WEEK OF JUNE 23

Written by Gallupsun Staff

What do you know? If you discover that you know very little—you're in good company. It's up to you to forge ahead and make a new path. This is how you do it. Open yourself to the possibility that life is not always what you imagine it to be. You may have found favor in one area and lost it in another. If one person cuts you down another is praising you. So what?
