

***The Sun marches into Libra on Saturday. Happy Birthday to the peacemakers! Achieving balance will be your goal this cycle. There is always a delicate balance. Madame G suggests you consider the “shadow” aspects of the sign. Justice is blind, but human beings possess compassion. Weigh out your options carefully, but don’t get stuck in the muck. Good luck!***

**Aries** (March 21-April 19)

You have a knack for balancing. Great job! While you’re prone to perfection, no one is truly perfect—not even you. Get out of your own head. Do something extraordinary for your significant other. You don’t need to charter a plane to Paris. Just be surprising. Do the chore they hate the most. Give them a Spa or game day. You’ll be blessed tenfold. And they’ll be so happy.

**Taurus** (April 20-May 20)

Life is always work. But, it’s the life’s work you should be doing. Stop getting so bogged down in the nitty-gritty details. Why bother looking at the tree if you can’t see the forest. In other words, don’t miss out on fun time with your kids, dogs, or loved ones just because you’re “busy.” Join the 21st Century everyone is busy (who cares) live a little. Or you never will.

**Gemini** (May 21-June 20)

In the end, no one has it all or is “it” all. You must decide if you’re enough for you. And if you’re not, then you must decide what that will take. When are you enough? You may want to run a marathon, get a degree, or start your own business, but that doesn’t mean you need those things. You don’t need to look anywhere except your own heart for who you are inside.

### **Cancer** (June 21-July 22)

Truly life is full of riddles. Stop putting people in tiny boxes, such as “she’s only good one thing,” or “he’ll never get anywhere.” Before long you’ll put the entire world in a little box. Eventually they’ll put you in your own box as a “certain kind of hypocrite,” and it might be permanent. Rather than judging others, learn. You might be surprised. Results may vary.

### **Leo** (July 23-Aug. 22)

Have you ever played a kazoo? If not, why not? When was the last time you cut lose and cut a rug? You may think the world should come to you, but consider you may need to come to the world. If you want to expand your horizons beyond a three-peaked mountain, take a little trip down south. The weather is warmer. The birds are nicer. And the food is better. Just sayin’.

### **Virgo** (Aug. 23-Sept. 22)

Only you know the right road to take. Frost said: “I took the road less traveled by and it has made all the difference.” It’s up to you to do what is right or wrong. This is your life to live. You may have seen better days or regretted the scenes before. It may be a lonely road that others refuse to go. In the end only you can make it. It’s your road and that makes all the difference. Live well.

### **Libra** (Sept. 23-Oct.22)

Let’s talk shadows. Libras possess a beautiful knack for peacemaking and organization. Unfortunately, the world is not always calm. Don’t panic! You have the skills to help you. Prepare for the shadow side of your sign. You may face indecision and the dreaded “flip-flop” maneuver. If you weigh each decision well—you must trust yourself and make a decision.

### **Scorpio** (Oct. 23-Nov. 21)

Where will you go from here? Why anywhere my dear. You possess the passion and strength necessary for any endeavor. You must decide which fate you will follow. Stop harassing yourself. Look deep within and find your calm center. Focus on one thing to change (just one keystone habit) and work on that. From there all others will follow, but you must choose wisely.

### **Sagittarius** (Nov. 22-Dec. 21)

It's in the name, you're a force of nature. Mother Nature is not always kind, good, or cruel. She just is. You must decide where you will put your new energy and new outlook. Will you follow your trends toward a new path or head right back to the center? There is no "right" decision. But, you must decide and your decision will have positive and negative results. Be cautious.

### **Capricorn** (Dec. 22-Jan. 19)

What's on your mind? If it's the same old same old, then you only have yourself to blame. In order to shape new habits, you must form new ones, better ones. They must compel and drive you. They must fuel and push you forward. If you don't believe you'll succeed you won't. If you believe you can, you already have. Believe that life is already getting better and you're there.

### **Aquarius** (Jan. 20-Feb. 18)

You must think carefully about this dear Aquarius, whatever "it" is. Take a little wisdom from the Librans and weigh out each potential outcome carefully. This is serious business, so too must your approach be. This is not the time for lingering or self-doubt. Push aside emotions and think through your options carefully. This will tell you what you need to know. Then act.

### **Pisces** (Feb. 19-March 20)

You feel a little intimidated. You love the new challenge, but it hasn't really solved anything new. Why do you think dear Pisces? Because you haven't changed. You may have changed your address, location, job, and/or spouse. However, the essential bits that make you, you have remained the same. This is neither good nor bad. To have different results, you must change.
