

***Enjoy a New Moon on Nov. 18. This is the time to pursue personal goals with the passion of a Scorpio. You may benefit from the intensity of focus and deep probing associated with this fixed water sign. But beware of the shadow side, which brings obsession and burnout. Madame G suggests that while pursuing your goals you also enjoy the season. Happy Thanksgiving!***

### **Aries** (March 21-April 19)

This is the time to put those personal goals into action. You're capable of taking your dreams to the next level. This will require patience and persistence. Madame G recommends you take some time to evaluate those goals. Are you pursuing your goals for the right reasons? Look for the higher purpose and pursue it relentlessly. With clarity comes peace of mind. Good luck!

### **Taurus** (April 20-May 20)

Your heart's in the right place. Are your words? It's hard to know what to tell a friend who is suffering. It may be depression or the loss of a loved one. Instead of lecturing, lend them your ear. If they need advice, they'll ask. It's more likely they need a friend to lean on. This saves you from spending too much energy on a problem that isn't yours to solve anyway. Practice detachment.

### **Gemini** (May 21-June 20)

Your interests are vast. Time is limited. Instead of pursuing every whim that occurs to you, spend time focusing on yourself. When you have all the free time in the world, what do you do? What do you spend the most time thinking about? Or better yet, what has remained constant through all the changes? When you figure that out, pursue it. Write it down.

### **Cancer** (June 21-July 22)

You don't always understand yourself until you take a risk. You may have thought you were into something that you eventually outgrew. Maybe you pursued a career that no longer interests you or that you no longer believe in. Perhaps your heart is no longer in it. Whatever the case, you'll never know until you try. This takes courage. Starting over is not for the faint of heart. You're tough.

### **Leo** (July 23-Aug. 22)

Your ideas continue to flow through your fingers. You couldn't be happier. The challenge of putting up 400lb support beams alone at age 70 is a feat. But you're not done breaking down social stereotypes. That's why you got a tattoo in a room full of 20-year-old Marines. Create special moments throughout the week and indulge in smashing stereotypes.

### **Virgo** (Aug. 23-Sept. 22)

What's up, pussycat? You don't know if you're coming or going. This is tough on the Virgo sense of control. Instead of losing yourself in the season, practice radical self-care. That doesn't mean just getting a mani-pedi. You must exercise every day, eat healthy every day, laugh every day, and socialize with your loved ones. Start reaching out. You need this.

### **Libra** (Sept. 23-Oct.22)

Everything is looking up. This is good and a bit of a break from the tough months behind you. Has anything changed? You may think that everything is better, and it might be. It might also be that your perception about certain situations has evolved. It's funny that sometimes nothing has to change in order for everything to get better. Look for the silver lining and you'll find it.

### **Scorpio** (Oct. 23-Nov. 21)

The energy of the Scorpion is in full swing. Take advantage of this upcoming New Moon in order to evaluate what you most need out of this life. Write down your goals and continue to pursue them. It's likely that you've already begun to make plans. This is an excellent time to refine them and start financing them. How will you cope with this new era? You will.

### **Sagittarius** (Nov. 22-Dec. 21)

What's next? You have so much to learn and discover yet it sometimes feels like you're running out of time. If this is the case, don't panic. You just need to reevaluate yourself. What are your goals? Do you hate your job, your life? If this is the case, you really only have yourself to blame. Get it together and get off the couch. You're capable of so much more than you ever thought.

### **Capricorn** (Dec. 22-Jan. 19)

If you're absorbing too much of the shadow side of the Scorpio, namely obsession and burnout—it might just be time for something new. It's not over til' it's over, but you might be cooked. It doesn't need to be an all or nothing situation. Instead you may need a break before pursuing something else entirely. Have you always loved art, but never tried it? Now is the time. GO!

### **Aquarius** (Jan. 20-Feb. 18)

Pursuing your dreams is hard and scary. It's even worse when it seems like no one believes in you. Never assume you know what others are thinking. It's best just to ask. But, when it comes to your dreams, only you know if you're capable of more or not. You may have a life goal that no one understands, but if it brings you joy it might be worth it. Life is short.

### **Pisces** (Feb. 19-March 20)

You may notice that after a while a few people just drop off. It might not mean anything. But when everything fails it's always good to stop and evaluate the common factor. If it's you, you may need to change some habits or change the group you're spending time with. If this happens often with people you like, consider what you do that leaves others hanging.
