

Mercury is in Sagittarius, so we're less inclined to dig deep and more likely to go with the flow. This is a great time to enjoy freedom and discovery. Explore the world around you. Madame G recommends you learn how to hunt for treasure without leaving your house. Don't lose sight of your true purpose. Use this time to add to your true gifts and passion. Bon Voyage!

Aries (March 21-April 19)

Start planning for the future. But don't go overboard. Remember the saying: "life happens when you're busy making plans." It's important to look at the big picture, but you don't want to get so lost in the details that you lose sight of your life. Take a moment to breathe and enjoy the quiet moments in this world. If you can't find those moments yourself, take time to create a little coziness with your friends.

Taurus (April 20-May 20)

You're probably feeling a little stressed. Maybe your scalp is sore and you're losing hair. This might not be your imagination. Visit the doctor. When you've ruled out medical issues, consider lowering your stress levels. The Swedes practice "lagom," which means "just right" You don't want to work or relax too much—you want it just right. Ask yourself: Where is your lagom? Where is your just right?

Gemini (May 21-June 20)

You've got a pretty flexible "go with the flow" vibe, but that doesn't mean you don't take things seriously. You just take them in stride and that's perfect for you. You also realize that everyone has their way and it might be different from yours. Consider using your talents of bringing people together to bring people together. Make plans with a friend and invite someone new.

Cancer (June 21-July 22)

You've got miles and miles to go before you stop, and that's a good thing. You're tired of resting on your laurels barely making it happen. You've got the ambition to take yourself beyond this first trial and on to the next one. You're perfectly capable of doing so much more than you ever imagined. The time is right for you to take up the sword. You'll get there, just keep going.

Leo (July 23-Aug. 22)

You're tackling life goals and turning them into dreams. You're living the dream. How wonderful! This is exactly what you should be doing at this point in time. But don't forget to stop and enjoy the little moments. Stop and watch a sunset. Enjoy a baby deer running after its mother. Play with the dogs and enjoy a long hot cup of coco. Yum! Life is good.

Virgo (Aug. 23-Sept. 22)

So much to do and so little time, you may feel that it's all a little disappointing after a while. This is to be expected. You're looking outside of yourself. You don't have to really look for anything beyond yourself. Start looking inside. What do you want? Where is your passion? You may not find it right away, but looking will be so much better once you've started. Bon Voyage.

Libra (Sept. 23-Oct.22)

You're a little miffed. Maybe the world doesn't understand that this is a very important thing you're working on. Maybe they don't realize how amazing you've been. Maybe you are really amazing. But does it really matter if you've alienated everyone? The world might not really be wrong. You might need to rethink communication—it's a two way street, not a one way.

Scorpio (Oct. 23-Nov. 21)

You're exploring options. Now isn't the time to spring from the trap. You've built the template and prepared the assault. You're simply waiting for the right time. It'll come, and before you know it—you'll be there and onto the next phase. You don't want to jump on the first halfway decent offer. You want the chance of a lifetime. You want the big ticket that reeks of passion.

Sagittarius (Nov. 22-Dec. 21)

Your time in the Sun is fading. You must consider where you will go from here. It's not a simple matter of looking for the least bad option, you must make a choice. Stop wasting time. If you don't like it that's fine, but don't pretend you're happy with what you see. Now is the time to make the right effort and live the life you've always wanted. Don't fret—it'll come.

Capricorn (Dec. 22-Jan. 19)

You have wild ideas about life. Are they wild enough? Don't get trapped in the delusions of a drunk fantasy. Enjoy the fruits of a well-examined life. You could travel for perspective or read a new book. Enjoy time outside and the smell of freshly cut flowers. Treat yourself with something beyond money. Don't get lost behind the mirrors of smoke and flesh.

Aquarius (Jan. 20-Feb. 18)

You're a brave soul. This manifests itself in funny ways. Maybe you stand up to rude people at check-out lines, or work hard for the rights of all human beings. Whatever you do, don't lose heart—this is the best you can do. Look inward for peace and let that radiate out of your heart. It's a blessing and a curse to be wise beyond your years. It's also important to practice self-care.

Pisces (Feb. 19-March 20)

All you need is love...and maybe some perspective. You have to live with yourself. You may think that others are out to get you, but this isn't the case. You have your own ambitions and challenges, but that doesn't entitle you to anything else. Stop trying to tell people what to do. Live your own life as you need and be who you would like to be friends with. Good luck!
