

Say goodbye as the Sun leaves grounded Earth sign, Capricorn, and enters Aquarius. The emphasis will change from “what is” to “what is possible.” The New Moon shifts our perspectives as well. It’s time to reflect on what we have, what we want, and who we need to become. Madame G recommends you take time now, to live your fullest self, and become it.

Aries (March 21-April 19)

Life is painful. If you find that you’re in the middle of a growth spurt, know that this too shall pass. Nothing lasts forever, not even pain. You may need to ground down your ego, so that you may become your greatest self. This may mean taking a few blows. This doesn’t mean you don’t have talent. You may just need to sit down and rewrite the entire story. Keep going.

Taurus (April 20-May 20)

The greatest talents require practice, practice, and more practice. You may not be good at something the first time around or even the hundredth time, but you will eventually notice progress. You may not be the best at it, but you can be better. Take time to reflect: “is this what you really want?” If your love and purpose is greater than the pain you’ll succeed.

Gemini (May 21-June 20)

You don’t need to win the lottery in order to live a fulfilling life. If you find yourself saying: “I’d be happy if...” Take a moment to reflect, you live the life you’re working towards. If you don’t put good effort and thought into living and loving those around you—you probably won’t be happy, even with millions. Think on this before you head towards risk taking and thrill seeking.

Cancer (June 21-July 22)

You have but one life to live—it's important you give it all you've got. You don't need to be the superstar of Instagram or YouTube to be happy. You just need to be you and live to your fullest potential. This means pursuing your bliss and being there for your family. If you haven't yet discovered your true passion, you may feel insecure and confused. Keep looking. You'll find it.

Leo (July 23-Aug. 22)

What an interesting dilemma: to be happy, or super-duper happy. You have the option. The choice is right in front of you. What will you do? This great adventure of life is full of opportunity and interesting ideas. Once you've discovered your bliss, grab it by the horns and love it. Gratitude is an important feature as well. How blessed we all are to know such things.

Virgo (Aug. 23-Sept. 22)

What's in a name? Sometimes everything we know is wrapped up in one idea or another, and sometimes it's trapped in something else. Don't lose hope. You can do so much more than you ever imagined, just keep trying. You have great potential to achieve your dreams, but you must first let go of fear. You must first believe in yourself and that you're capable of success.

Libra (Sept. 23-Oct.22)

You've tried and tried and now you don't know what's next. You have ideas for changing what's in front of you, and maybe going back to the drawing board. Instead take a moment to think about what's in your best interests. Then consider your family. Then ask yourself what you'd be doing if time, money, and fear weren't in your way. When you discover that—go with it.

Scorpio (Oct. 23-Nov. 21)

Follow your bliss. What does that mean to you? You may want to travel the world, enter politics, go to school, or write poetry. Your bliss is right in front of you. You will not be any happier in another job, career, or relationship than you are right now. If you want something greater, you must first become the person who is of that vision. Reflect on this and act on it. Embody it.

Sagittarius (Nov. 22-Dec. 21)

You're stuck. You don't know if this is a good or bad. But, you're quickly heading nowhere. Life is full of crazy potential and happiness. It's also got the same potential for pain and suffering. You're the creator of both. Sometimes they happen to you. In the end, it's how we react to life that matters. Make your decision. This is either happening to you or because of you.

Capricorn (Dec. 22-Jan. 19)

Now is an excellent time to reflect on what you'd like to change this year. Swap one bad habit for one good habit. If you want to give up junk food—you want to eat healthier. If you want to stop being so angry all the time—you also want to be happier. This will require that you start acting in a more positive way. Try meditating on what you have and reward yourself. It's good.

Aquarius (Jan. 20-Feb. 18)

You're ready for some action. This is an excellent time to go out and try what you've been learning. It's simply not enough to keep learn and not apply. You must also take time to educate those around you. They may not want what you have to offer, but they are capable of hearing it. You don't need to slap them around merely present it in the best light and give.

Pisces (Feb. 19-March 20)

Madame G guide to the stars WEEK OF January 12

Friday, 12 January 2018 07:36

The life we choose is always better than the one that's thrust upon us. You don't have to go to work—you choose to so that you may provide for your family. You don't have to eat healthy—you choose to because you want to live a happy beautiful life. You don't have to do anything—you choose to live the best life possible. Give more to others and they'll surprise you.
