

Happy Groundhog Day! Will the little rodent see his shadow or not? Folklore says if he sees his shadow (6 more weeks of winter) and if not, we'll have an early spring. For many of us, we're still waiting for winter, so maybe we should hope for a long shadow. Reflect on what this teaches us--nothing. Read a science book kid. Madame G says: get outside and have some fun.

Aries (March 21-April 19)

What's in a name? No, I don't mean Shakespeare. You have certain ideas in your head and you're ready to take off in the right direction. Don't give up. You can do what the other people do and stare at the Sun and hope for the best or you can take action. The right answer is getting ready and running. Don't hesitate. This is the world saying: GO!

Taurus (April 20-May 20)

Don't get your hopes up. Get your standards up. This doesn't mean saying: you'll only date Channing Tatum and eat caviar. Those are not standards—that's more like a lifestyle. Standards are the expectations we've set for ourselves. Don't look outside of yourself. You must become better in order to have better. Recreate yourself and start acting as if you're already there.

Gemini (May 21-June 20)

You're misunderstood. Don't play that card. Welcome to the club. You don't need the appreciation of others to get going where you want to be. All you need is a little pluck and an iron will. Start living the life you've always wanted and stop asking for permission. Start heading off in the direction of the sun and chase those dreams girl! It's now or never.

Cancer (June 21-July 22)

What's your time worth to you? You can hide away in the shell of your mind (if that's working for you) or you can try a new tactic. Others may not appreciate your talent, but if enough people start saying the same thing—look for a common pattern. What are they trying to tell you? Maybe you really do need to ease up and get more experience or be more patient.

Leo (July 23-Aug. 22)

Do you remember Freud? The Ego, Superego, and Id may be debunked science now, but you're noticing a pattern with a few dodgy looking people. Don't be afraid to say you need alone time. You may also notice that your ego is getting in the way of helping others—maybe you can't tell. All in all, don't lose sight of your own desires. What are you worried about? Live a little.

Virgo (Aug. 23-Sept. 22)

So this is love? Are you fulfilling expectations? Maybe you've hit on the perfect career. Maybe you're heading for greatness. Perhaps not... Who can tell? You can. If you're feeling a little down in the dumps, consider that you may be noticing a bad smell. Don't doubt yourself—you may be standing in manure. This is no cause for concern if you're a farmer. If not, look out.

Libra (Sept. 23-Oct. 22)

You've got your purple lipstick on and a foot on the accelerator racing down success highway. No one can stop you or force you down the limited path. You won't stop for anyone. But, hang on. Didn't you just run a bunch of people over? At times it's uncomfortable to name your mistakes and yet it's necessary. Show your human side and others will respond.

Scorpio (Oct. 23-Nov. 21)

Act like a Queen and others will treat you with respect. This doesn't mean acting like a four letter word for a female dog. Instead consider watching, Netflix's the, Crow. Conduct yourself with dignity, quality, and grace. Show compassion and kindness at all times. When necessary be firm and display strength through reason. You're no one's pushover. But, you're dignified too.

Sagittarius (Nov. 22-Dec. 21)

Well, the day has arrived. What will you do? Will you run from the necessary work of life or will you cry like a baby? The choice is yours and you can make any decision you want. This is how life works. Take time to reflect on your actions and take others at their word. If they say they're unreliable---they probably are. The same applies to you.

Capricorn (Dec. 22-Jan. 19)

What's your favorite time of year? Maybe you've been enjoying what you're doing and that's great. What would you like to do? If you're a creative person, this may mean taking time out for your art. If you enjoy computers, consider taking courses or learning something interesting that intrigues you. You don't have to wait for the perfect time—it's now.

Aquarius (Jan. 20-Feb. 18)

Where are you? What are you doing? If these are the questions you find yourself asking, do something about it. You have so much potential and it's lost amid the indecision. Stop worrying! You might make a mistake. Oh dear me... And that's very human too. But, you can't keep putting off your dreams for something that doesn't exist like perfection.

Pisces (Feb. 19-March 20)

Madame G guide to the stars WEEK OF FEBRUary 2

If you're feeling lonely and lost you know what to do—get out there and mingle. If you need structure and purpose join the Army. If you need love and compassion, volunteer at an animal shelter. You can find the answer to almost any question on Google except: what should I do with my life? That's entirely up to you. Narrow it down and start thinking about it clearly. Do it now.
