

Don't let the quiet fool you. Instead be the wary wise man. Take a few deep breaths and meditate. Use the quiet of this week to rest and reflect. There's nothing like a little nap to refresh your mind, body, and soul. Madame G recommends that you consider the needs of your body, and listen. What's yours saying? Start jogging or read a good book. You've earned it.

Aries (March 21-April 19)

You always hit the ground running and you sprinted at a dead run for miles. Yes, you're a beast. But, you're only mortal. Take a few days off, or if that's not in the cards take small breaks throughout the day. Don't forget to eat and take care of yourself. If you feel compelled to keep working—that's fine—just don't neglect your health. Breathe deep and smile. You're on it.

Taurus (April 20-May 20)

You're not sure if this is the way out or not. It may not be the way forward. However, please consider that it may be a sideways move. Think outside the box. Okay, pretend there isn't a box. Maybe you could imagine that it's an active volcano and you're hopping on cool stones to get away from it. Whatever the case, there is a solution you just need to find it. Maybe stop looking.

Gemini (May 21-June 20)

Where will you go from here? You're not like other signs. Your active imagination and fiery temper are tempered by compassion. In fact, you might get trapped into saying you're angrier than you are. You're not one to carry a long standing grudge—you just can't work up the energy. And really that's the best game anyway—your enemies will fume and you're unaware.

Cancer (June 21-July 22)

That's how the story goes... Don't hang onto your baser instincts. You may wish to put an end to your enemies, but is this wise? Your spark to anger is dangerous—mainly to yourself. You may become so wrapped up in a drama that doesn't exist, that your hunting skills come back to burn your ass. You can't destroy people—only relationships. Caution, danger lies there.

Leo (July 23-Aug. 22)

Orale! So, are you having fun yet? If not, why not? You should be having the time of your life. You don't need to work your fingers to the bone. You can take time for yourself and your family. In fact, this is the perfect week to try out something that's very self-indulgent. Perhaps you need new shoes or a fun trip to a new place. Whatever the cost go out and have some fun.

Virgo (Aug. 23-Sept. 22)

You're hanging fast to your dreams and not letting go. You've never been a fan of convention or how "everybody else" does things. You want to make a mark on the world, and have fun doing it. You hate the rat race and what it's done to people and the planet. If you have fire in your belly, now is the time to show what you're made of. Get out there and make a difference.

Libra (Sept. 23-Oct.22)

Miles and miles to go before you sleep... If this is true for you, don't despair. Use your down time wisely and rest whenever you can. The Romans said: "don't stand when you can sit or sit when you can lie down." In other words, rest! You're not the energizer bunny and you'll burn out if you're not careful. Take moments from every day for yourself. It's not selfish.

Scorpio (Oct. 23-Nov. 21)

Patience is a virtue, dear Scorpio. Though the world may see a tough exterior, you know what lies beneath. You've thought about it for months, plotting, and planning. But, the timing is just not quite right. Therefore, you wait and think. Your patience is wearing thin, and you're at the point you'd rather the challenge of starting over than finishing. But, patience is a virtue...

Sagittarius (Nov. 22-Dec. 21)

What will you do? Is this the best plan? It may have flaws that you can't see. Instead of running into the fire, consider asking a trusted friend or mentor about your plan. It doesn't hurt to run it by a disinterested party. Be cautious! Not everyone will give you good advice—they may try to harm you. Speak with someone you can trust and who doesn't have a stake in it.

Capricorn (Dec. 22-Jan. 19)

The world is your oyster, only you can limit your impact. Stop focusing on what you can't control. Only fools and thieves attempt to manipulate time for their own ends. You're not the master—you're a bystander and sometimes actor in this great world. Try something new that sets your heart aflame. Do something that scares you before it's too late.

Aquarius (Jan. 20-Feb. 18)

So many thoughts running around in your head, it's like having 10,000 bunnies hopping from one stray thought to another. Stop the madness! Take a moment to enjoy your life, and take care of yourself. It's never too late to try to do something new or to be the best. It's also okay to rest and take a moment for yourself. You can't blame others for failing when you don't try.

Pisces (Feb. 19-March 20)

Well, that happened. You don't know what to make of it. Are you delusional or happy? You really don't know and that's okay. You may find that your life is slipping into an abysmal hell. But, it's of your own creation. You can't keep holding yourself back and expecting different results. The world will not be kind, if you don't make a good effort to try your hand at life.
