

***Are you ready for this? The New Moon slashes through the night sky on April 15. As you look up at the sky, consider this, even with the moon hidden the stars sparkle free and clear. Instead of getting trapped in the minutiae of things you can't change, think about all that you do have and what you can change. Madame G wishes you well. Spring-cleaning begins. Refresh! Renew!***

### **Aries** (March 21-April 19)

What actions are you taking towards success? If you're an artist, you should make art. If you're into business, you should read upon business practices here in New Mexico (or wherever you are). Whatever makes your heart jump with feeling and pushes you out of bed in the morning, you should pursue that. Take heart. You won't get there in one day. But you will get there.

### **Taurus** (April 20-May 20)

What's your heart's passion? You can't just say your kids, job, or partner. These are great things. But what are only you capable of doing? You have a talent. What is it? You may be a talented leader who works as a bus driver and painter. Whatever skills you have that are unique to you, may be used to help your community in fun and exciting ways. Have a blast and keep learning.

### **Gemini** (May 21-June 20)

Whatever you do, don't look down. Oops! You looked. Never fear, it's easy to see failure when you're 80 feet up looking down a narrow bridge. It's natural to shake in your boots. You don't want to run off the cliff. However, the presence of a cliff does not mean failure. In fact, after careful planning and preparation, you must put one foot in front of the other and go. Do it!

### **Cancer** (June 21-July 22)

What's in a name? Yours is unique to you, and yet it may not be overly unique. There could be a billion people with your name and there would still be only one you. If you must be hard on yourself, remember that you are you. There are those who will be smarter, faster, cooler, and bigger, but you're you. No one can change that fact. And that's a pretty good thing. You do you!

### **Leo** (July 23-Aug. 22)

How do you figure that? If you have some crazy ideas for implementing change in your world, even if it's a little unconventional, you should just go ahead and do it. Don't wait around for others to appreciate all the work you've done. Stand back and behold your kingdom. You've earned the space to take your time and do whatever you want, whenever you want. Yay!

### **Virgo** (Aug. 23-Sept. 22)

How's it hanging? You may not feel like you have enough time to get it all done, but don't forget to stop and smell the roses. You can do whatever you want so long as you enjoy yourself. This is a pretty crazy world with one heck of a ride. Sometimes the price of admission seems pretty high, but you can do anything you put your mind to. Don't give up. Do your best. You can do it.

### **Libra** (Sept. 23-Oct.22)

All's well that ends well. You don't have to be a fan of Shakespeare to appreciate the theme of his play. What's the moral of the story? Don't make a mountain out of a molehill. Don't get so angry that you're ready to murder someone—it's bad for your heart. Take time to think about what you can do with what you have. It's not up to you to solve the problems of the world.

***Scorpio*** (Oct. 23-Nov. 21)

Don't lose hope dear. You may feel a lag in your energies. Your normally exuberant self may feel like the wind is down and you're a sailboat stuck at sea, set adrift. This too shall pass. You must look deep within for the answer. You can't just change your job or your hair. Sometimes you need to change your entire perspective and sometimes just look up or take a step back.

***Sagittarius*** (Nov. 22-Dec. 21)

What's up? You may think this is an easy question, but it may not be. You can't just spend time running through space and not focusing. There are those that need your leadership and guidance. It's definitely more fun to be a cat in space than getting mired in the details but the devil, they say, is there. So, you may want to take a break and then get back to it. Search carefully.

***Capricorn*** (Dec. 22-Jan. 19)

How the hell did you get here? It's a question you might ask yourself, and often. But are you really shocked? You are the main character in your life. You have impetus and drive. You can make things happen or allow things to happen to you. Either way, you must be grateful for what you have and learn to be better than you ever expected. Good luck!

***Aquarius*** (Jan. 20-Feb. 18)

This is it. You're getting there. You're definitely making headway. It may not feel like it right now, but you'll get there. Don't give up. Keep pushing forward. If you need to make some changes, be ready for minor modifications. But don't get stuck. You can do anything you set your mind to. Just don't forget about the basics: breathe, eat, rest, and smile.

***Pisces*** (Feb. 19-March 20)

Well, it's looking better and better. You don't know if this is really the way to go or not. Does it matter? Probably not. Remember, when you say "no" to something, you're really just saying "yes" to something else. In fact, by saying no to something that you don't want to do—you're saying yes to something that you do want to do. You've got this!
