

Mars enters Aquarius on Sept. 10 and will remain there until Nov. 15. This is a fun and dynamic pairing. But the energy can become a little hectic and dysfunctional if you're not careful. Madame G recommends you get creative, use your wits and have fun. However, be mindful of your energy and don't put all your eggs in one basket. Make good decisions. Enjoy!

Aries (March 21-April 19)

What's your life like? Maybe you're a little on the introverted side and enjoy hiding away from humanity. Even if you head toward the more extroverted side, consider your social health. You may not have people in your life who support your growth. It's important to test yourself and move forward. You don't need to forget where you came from, to keep moving forward.

Taurus (April 20-May 20)

So you're moving forward and you don't know where you're going. That's awesome! It's hard to make a change—you don't always know how it will turn out. Save yourself a little anxiety and do your research. You don't need to run into the unknown without a map. If you're starting a business—there are resources. Whatever you're doing, look it up and run toward your dreams!

Gemini (May 21-June 20)

Hey, let's have a talk. It's not you, it's me. Have you ever heard this line? Hopefully, not it's garbage. There's nothing worse than hearing a cliché come out of someone's mouth when real feelings are involved. Remember, this says more about them than you. So whatever you're doing, take really good care of you. You're worth more than a tired excuse. You can do better!

Cancer (June 21-July 22)

Don't go crazy! It might be a legal term, but it's not a clinical one. Labels mean different things to different people. If you're not a lawyer or psychologist, crazy just refers to people who get mad easily, or seem a little off. So consider reigning in some of those emotions. Real adults deal with bullshit on a daily basis. But that's OK. You're not really crazy. You'll be OK.

Leo (July 23-Aug. 22)

You know the best way to someone's heart is through their stomach. But if you want to get through to their mind, use conversation. If you want to appeal to their emotions—you must first listen. It's easy to get to the point where you don't want to hear what other people have to say. But that's a very lonely place to be. Instead, reach forward and listen while you grill that steak.

Virgo (Aug. 23-Sept. 22)

Your mind is in chaos and you're not sure why. Maybe you need to listen to your gut and think about what you want from life. Don't just give yourself to whatever projects fall into your lap. Instead, take time out of your day to do what you should always do. Listen to your heart. Sometimes, it will break, but when you move forward, it will thank you with peace of mind.

Libra (Sept. 23-Oct.22)

Love is a beautiful thing. But you can't get caught up in showing your loved ones that you care by buying them something. There is very little that can be shown with money. Apart from providing the very basic necessities, such as shelter, food and clothing—your loved ones need you. They don't need something you picked up on the way from work. Think about it.

Scorpio (Oct. 23-Nov. 21)

Time marches on! That's all you really need to know. One day, you will die. Madame G recommends you live the life of your dreams, now rather than later.

Sagittarius (Nov. 22-Dec. 21)

Your head is wrapped up in the clouds and you don't even know it. You can see the Earth below you, but you're not really paying attention. If you start to feel your soul leaving your body—you might have a problem. In other words, it might be time to come back to Earth. Dreaming high is great. But you still need to put in the work and get after it. GO! GO! GO!

Capricorn (Dec. 22-Jan. 19)

Do you know how much complaining is worth? That's right—it's zero! How about complaining to other people? That's right! It's worthless! So stop crying about what won't change and what will never be, and start enjoying life right now, as it is. You think this world is nothing but an inconvenience, well nothing is less inconvenient than death. Let go! Breathe deep! Enjoy.

Aquarius (Jan. 20-Feb. 18)

You are almost there. Don't give up on yourself. This is why you trained and why you practice. It's all coming down to these few precious moments. Use what skills God or the Universe has provided and get back to doing what you love. Cut loose and live free. You're more than capable.

Pisces (Feb. 19-March 20)

Slow your roll! You might be losing it. If you find that people run away when you walk up, or hide behind counters to avoid you, or shut their doors to block you out, you may need to rethink how

you come across. Do you smell? If you don't and practice proper hygiene, it might be your personality. Do you naysay others? Maybe you're mad, pushy or needy. It might be time to stop.
