

***There's a New Moon in Libra Oct. 8. This is the perfect time to begin any new projects, as New Moons are all about new beginnings. In addition, a New Moon falling under Libra is the ultimate symbol for promoting justice and restoring balance. Madame G recommends you write down your goals and think about what you can do to restore peace and balance.***

### **Aries** (March 21-April 19)

Think before you act. Ponder these words from Ernest Agyeman Yeboah: "So many people live their lives not knowing the real and exact reasons why they live. They follow anything for something and they do something for anything. When you live life with a blurry vision, you live a blurry life. Vision is life, and a life without vision is a dead life"

### **Taurus** (April 20-May 20)

You've taken responsibility to a whole new level. You're capable of so much more than you think. But you must let go of the idea of perfection. Embrace instead, the idea that you are working toward your own self-completion. This may or may not strike you as a profound thought. But if you take a moment to think about it — you're halfway there. Good luck!

### **Gemini** (May 21-June 20)

Your heart is caring and generous. You've done so much for those around you and you're loved. Don't worry about failure. No one is watching or waiting for you to fail. If they are, they're not your friend and you're well rid of them. Most people are ready and willing to celebrate your life and work. Open up your heart and eyes and you'll see their shining lights.

### **Cancer** (June 21-July 22)

It's hard to admit when you're wrong. It's harder to look around and wonder what happened and if you're really all to blame. In the end, blame does nobody any good. It may or may not make someone rethink their life and take accountability. Instead, focus on what you can do better. Challenge yourself to keep looking the day in the face and smiling. Say hi!

### **Leo** (July 23-Aug. 22)

Hello, day! If you've been a bit off — don't worry about it. Everybody has an off day or 1,000. There are no limits to how many bad or good days you get. The choice is yours and you're more than willing to take it on with a laugh and smile. If at first you don't succeed...try, try, again, unless you need to quit and do something else. That's okay, too. Do what you need to do.

### **Virgo** (Aug. 23-Sept. 22)

So you turned around, fell out of a tree, and broke your wrist. You're trying to gain a few gray hairs aren't you? Well, don't sweat it. Take the rest you need and allow yourself to heal up. If you feel like you can't rest — talk yourself out of that bad idea and rest anyway. Listen to your heart's favorite songs and enjoy some much needed Netflix therapy.

### **Libra** (Sept. 23-Oct.22)

The Sun is in your sign, dear Libra. You may feel a surge of energy and renewed power. Take advantage of this amazing turn of events and put your mind to good use. Develop as many new skills as you need, so that when you're ready to make your move — you're ready to go. Good luck!

### **Scorpio** (Oct. 23-Nov. 21)

Well, it's been a few days... You may or may not know if they're good or bad. In the end, you need to focus on yourself. But turn the self-help industry on its head. Instead of focusing solely on what you believe and why—start seeking out those who also ask those questions. Or consider helping those who suffer in the same way you do. Together you might just solve your problems.

### ***Sagittarius*** (Nov. 22-Dec. 21)

Don't give up. Look to the skies and search for meaning with a friend. As Dale Carnegie said, "Most of the important things in the world have been accomplished by people who have kept on trying when there seemed to be no hope at all."

### ***Capricorn*** (Dec. 22-Jan. 19)

So you're pushing through! That's great. Isn't it? If you don't know why you're doing something, then it's probably a really good idea, if you stop to ask: Why? You may not know at first. It may take you the rest of your life to figure it out. But Madame G recommends you start now rather than later. It may take a while, but what a journey it will be.

### ***Aquarius*** (Jan. 20-Feb. 18)

Losing hope is a bit like losing a bit of your brain. It might feel like it's not functioning, much like when you forget a word and it's on the tip of your tongue, but it's not lost forever. You just need to stop and rest. In the end, keep pushing through and learn how to rest, sleep and laugh with those around you. Once you do that, hope is restored.

### ***Pisces*** (Feb. 19-March 20)

## **Madame G guide to the stars WEEK OF OCTOBER 8**

---

Keep going. You're almost there. If you don't push for what you believe, you'll be stuck seeing someone else's vision through. Make a change. Be you. Be the best you that you can be. Good luck!
