

***The Sun is in Taurus and the Last Quarter Moon appears on May 26, so get ready for some stubborn winds. People born under the sign of Taurus are kind, hardworking, and often very reliable. They're also stubborn, independent, and unyielding. This gets them into trouble. Madame G recommends that you take from the positive and adopt some flexibility. You might learn something.***

### **Aries** (March 21-April 19)

You're not perfect and the world is going to disappoint you. But, that doesn't have to be a bad thing. You also don't have to lower your standards. You can maintain a high standard of excellence for yourself and still exert the least amount of effort worrying about it. Instead, take action when you can and let go of the things you just can't change. All will be well, or it won't.

### **Taurus** (April 20-May 20)

As the sign of practical luxury, you're encouraged to do something a little indulgent on Monday. The next day, El Sol blazes into Gemini and your second house of financial foundations and practical planning until June 21, accompanied by analytic Mercury (until June 4). Starting when your alarm goes off Tuesday morning, be prepared to roll up your sleeves and hunker down into a more grounded groove after a hedonistic 30 days.

### **Gemini** (May 21-June 20)

You're a funny one. When you finally find the answer, you look for another one. Well, that keeps you interesting and lively. You can do better. Everyone needs a break. It's time to take some time to reevaluate your situation. This is not the beginning or end, unless you say it is, and that call is yours to make. Think before you make the step you're considering and then let go.

### **Cancer** (June 21-July 22)

This is the final phase of your astrological year: El Sol will blast into Cancer for a month on June 21, and before it does, you'll benefit from clearing away the old so you can start your personal new year with a clean, blank slate. While this is a great cycle for slowing down and carving out time for personal projects, some Crabs will throw themselves into a major decluttering mission.

### **Leo** (July 23-Aug. 22)

Mercury is only here for two weeks, so use your communication skills and powers of persuasion to attract the perfect associates. In your personal life, you may "suffer" from an embarrassment of riches with more invitations coming from more diverse fronts than you could possibly accept.

### **Virgo** (Aug. 23-Sept. 22)

This coming year, Madame G recommends that you consider taking a different route than the one you normally take. You have the option to open up to those around you and discover something new, or do what you've always done. Be cool. Try something new and remember, if you hate it, you can always go back to the boring tried and true. It's your choice. Good luck!

### **Libra** (Sept. 23-Oct.22)

With the planetary duet of the Sun and Mercury in this adventurous realm for two weeks, you'll be a first-class jetsetter, whatever class ticket you buy! Your quest for wider vistas and greener pastures could take you to exotic locales. Make sure your passport is current and you're free to roam.

### **Scorpio** (Oct. 23-Nov. 21)

So Scorpio, you hate to be wrong. You're often misunderstood and you usually have a handle

on everything, but once in a while you miss the mark by a smidge. In the end, you're odds are pretty good and you can take it all to the bank. But, it's a good time to remember that everyone makes mistakes and you're no exception. Have fun with the novelty.

### **Sagittarius** (Nov. 22-Dec. 21)

Keep trying and stop acting like this is the end of the world. You are more than capable, if you put your mind to it. In the end, your life is what you make it. Put your hands on the steering wheel and your foot on the gas and get going. Now is the time to keep working and pushing yourself forward. Your life is yours to live and love.

### **Capricorn** (Dec. 22-Jan. 19)

Don't give up on your dreams. This is the time to change your life. Take a deep breath and smile. It's not over until it's over. Don't give up. Be the little engine that could and say: "I think I can, I think I can, I think I can." Then you'll know that you can, because you'll have done it. Good luck! Your heart is in the right place.

### **Aquarius** (Jan. 20-Feb. 18)

With the Sun and Mercury firing up your fifth house, all eyes are on you, and your talents could attract some major attention. Also, keep in mind at this time that there's nothing wrong with the occasional splurge, as well as starting to voluntarily set aside a certain amount regularly.

### **Pisces** (Feb. 19-March 20)

Look at your calendar for the rest of the month and see if you've reserved enough whitespace for personal projects and interests. Your giving sign sometimes forgets to put yourself on the list of people to take care of. So before you reach the point of overload, take some time just for you.
