

Madame G recommends that you get out there and take advantage of the summer sun.

Aries (March 21-April 19)

You're heading toward new heights of indecision. Luckily, this is a good time to check for glitches in the system. Narrow down the options and watch out for Deja-vu. You know you've seen this hot mess before. You know it doesn't really get any better. You may say you hate the drama, but if you don't stop making it, it will go away.

Taurus (April 20-May 20)

This isn't the end. It's time to regroup and re-think your options. If you're heading away from a job, start by making the best you can of the situation. Do everything with enthusiasm and leave on a very high note. And remember. all your efforts of the past six months could finally reach the point of critical mass and come together with a flourish over the next two weeks

Gemini (May 21-June 20)

Even if you're trying to be diplomatic, chances are high that your words will come out with a little more gusto than you intend. Just because you have someone's attention doesn't mean they're in the mood to be lectured. Remember, you catch more bees with honey than vinegar.

Cancer (June 21-July 22)

You're looking for the next big thing. Maybe it's discovering how your child's shoe has PB&J inside the toe. Do you have a culprit? Angry toddlers are terrifying, but a parent on the case is unstoppable. Don't just hang around looking for clues. You can solve this case on top of dinner, work problems, and running around with a toddler with one shoe. You're amazing!

Leo (July 23-Aug. 22)

Don't waste this time! The Sun is in your house. Now is the time to use Mother Nature's energy to your purpose. Be careful not to get carried away with your superpowers. Under the best of circumstances, you're susceptible to flattery, Leo. Act wisely.

Virgo (Aug. 23-Sept. 22)

Get a job! You may take all the time you need in life to discover the world around you. It's important to take time to re-think your life. But, there's a difference between creating a life and waiting for it to happen. You can't live in dream land forever. In fact, you may need to get a little more aggressive. Take ownership before it's too late.

Libra (Sept. 23-Oct.22)

Stop waiting for tomorrow and take ownership today. You only have so many allotted days and you're so lucky that you have the ones you do. It's a gift! Use it wisely. You're entitled to make the most out of this crazy life like anyone else. Make this life, your life, extraordinary.

Scorpio (Oct. 23-Nov. 21)

You may need to narrow down your options. If you don't know what you want, it's a good idea to filter out what you don't want. Hate customer service? Consider a job in IT and coding. Maybe you can apply 10 years of customer service experience to the user experience.

Sagittarius (Nov. 22-Dec. 21)

Madame G guide to the stars Week of AUGUST 19

Written by Gallupsun Staff
Friday, 16 August 2019 02:05

Don't ask what the world will do for you. Ask what you can do for yourself. It doesn't need to be grand or orchestrated. Sometimes, the best things are in our daily interactions and habits. If you find you've given too much, step back and give to yourself. Only you can fill the void with what's missing.

Capricorn (Dec. 22-Jan. 19)

You might have a little more control on the economic level since you have the free will to curb unnecessary spending, reassess your budget and credit card bills, and even increase your bottom line by creating a new income stream. Solidifying your financial status is a very important goal for your future-oriented sign

Aquarius (Jan. 20-Feb. 18)

The year's only full moon in your sign powers up your first house of self and identity. You're heading in the right direction toward your dreams. This is the road less traveled and it's covered in weeds. Don't stop here. Keep going. You have cosmic support to put your top priorities above anyone else's and push a personal agenda with all your fierceness.

Pisces (Feb. 19-March 20)

When it comes to your own professional work, check your satisfaction level. What aspects of your career bring the most contentment and pride? This is the beginning. You're definitely starting out on a new path.
