

Enjoy a Libra New Moon on Sept. 27. This is the mark of new beginnings and the time to start new projects. Set intentions and goals that are important to you and don't be afraid to focus on yourself. What you want out of life is important. It's time now to pursue your dreams and goals with every inch of your being. Madame G wishes you well on your journey. Don't forget to enjoy the ride.

Aries (March 21-April 19)

It's up to you to be happy. You can't live your life trapped in anger and despair. You get out of life what you put into it. Make a different choice. If you're truly unhappy, you can make a change. Don't lose faith in yourself. To be a good friend, you must first learn to love, appreciate, and accept yourself. Don't give up.

Taurus (April 20-May 20)

The greatest gift you can give your family is to love and care for yourself. What drives you? What inspires you to be your best self? Don't be afraid to go against the grain of your past beliefs. Ease into a new lifestyle by making choices you enjoy and can stick with. These four weeks are also a good time to schedule your annual check-ups.

Gemini (May 21-June 20)

The only REAL danger is in not getting started. If you work slowly who cares? The point is to head toward your goals and inch your way forward. It may take five minutes or five years, but the point is - you will get there. These next two weeks are not the time to hide in the shadows. GO!

Believe in yourself and believe in your dreams. Your goals are worth of any effort. Now, is the perfect time to start a new project and put those plans into motion. It's one of your happiest times of the year. With the Sun beaming into Libra, you'll have no hesitation about prioritizing a few of your favorite things.

Leo (July 23-Aug. 22)

New Moons are fun, especially when you have a million and one projects (and a few extra ideas). Don't worry, you can complete them. You may need to do a little extra planning, but that's all part of the FUN! You may even wrangle in a few unwitting participants along the way.

Virgo (Aug. 23-Sept. 22)

You need space and time to be who you want to be. Don't get caught up in other people's dramas. Do your own thing. Once you discover yourself, the rest will take care of itself. Do your best. This is your productive time for getting everything related to work, money and security nailed down.

Libra (Sept. 23-Oct.22)

Show a friend some love this weekend and don't get caught up in the petty drama around you. You may need to rest and start planning for the next quarter. You've got this. You'll want to be free and clear to leave the past behind as the confidence-boosting Sun blasts into your sign on Monday, September 23. From now until October 23, you can shuck off any thing that haunts you from your past. You're on to the next thing.

Scorpio (Oct. 23-Nov. 21)

What is love? What is self-love? There is freedom in not knowing what will happen and there is a greater freedom in believing in who you are. Don't let people treat you like a dumpster for their

emotional garbage. Yes, you are strong enough to take it. Should you? This will eventually deplete you of vital energy. Take care of yourself and don't get lost in another person's drama.

Sagittarius (Nov. 22-Dec. 21)

Start a new project and discover more about yourself than you could ever imagine. This world is full of odd and blurry lines. Don't live in one fixed direction. Learn to analyze and think creatively. In other words, just set yourself free. If you've been locked inside your office unplug and test your social skills!

Capricorn (Dec. 22-Jan. 19)

Believe in your dreams. You are who you are meant to be. Keep your eyes looking forward and agree to help those around you. Develop a strong plan for yourself. You can accomplish anything that you put your mind to. Unsure what's next? This is a good time to work with a coach or use the process of elimination to rule out the things you know you DON'T want, and then make a list of what you do.

Aquarius (Jan. 20-Feb. 18)

Do what is best for your soul. Only you have the means and ability to know what that means. This is the time for you to take some bold leaps into the vast unknown. You might do something that surprises even you, like go back to school. You love learning for its own sake, and this cycle is designed for that.

Pisces (Feb. 19-March 20)

You might need to adjust to your life of solitude, but it might be only punishment for past transgressions. Travel less this year and rest. Focus on what betters your financial situation. If you're feeling tired, things are going to pick up very soon. Meantime, clear out any tasks you
