

Aries (March 21-April 19)

Poor Aries always misunderstood. This is the time to compromise and not wage war on the other signs. Libra is your direct opposite, but opposites attract. Follow your heart on this one and try to listen to the calm and rational voice of reason. You might just find yourself smiling and dare I say, happy.

Taurus (April 20-May 20)

With Libra dear Taurus, you're struggling to maintain a perfect balance between business and family. But, never fear your ability to handle investments is a great strength. Charge ahead and maintain a positive attitude. Smile deep and show those pearly whites. It's looking bright for the tough ox.

Gemini (May 21-June 20)

You'll find it difficult to reach your balance this month, Gemini. You want to compromise, but somehow everything, or someone, keeps getting in your way. Try to keep that sunny attitude warm and open. The negative Nancy's will try to thwart you, but you're concerned with more lofty ideas anyway. Madame G applauds your efforts.

Cancer (June 21-July 22)

Dear water sign, after the pressures of a hidden moon you'll appreciate the coming relief. Though not your house sign, you'll crave the peace and harmony Libra brings your daily life. Maintain your health by practicing good etiquette and self care. Being polite never goes out of style. A well-placed handwritten note might just be the ticket this month. If anything, it's a nice gesture.

Leo (July 23-Aug. 22)

This month your fire sign delights in the relationship side of the Venus ruled house. But, you might find your decisive nature tormented by conflicting interests, indecision, and passive people. Remember, not everyone has your quick wit, or fire, and those supposedly timid types may have a method to the madness. They may think before they act, which is a good lesson to learn.

Virgo (Aug. 23-Sept. 22)

Madame G basks in Virgo's perfection. Always on time and capable of handling the most difficult situations with grace, you're a tribute to poise. Have some compassion for us common mortals. You may feel your temper stretched this month because you dislike disorder. Allow your friends and family to reach conclusions on their own. You're probably right, but you don't have to brag.

Libra (Sept. 23-Oct.22)

The sun is in your house. Now is the time for a bit of fun and work. The key to achieving this perfection is letting go. You can't control how others act or don't. Take it all in stride and practice releasing control. Your emotions may surprise you and that dear Libra, could be a good thing. Passion is wonderful.

Scorpio (Oct. 23-Nov. 21)

Take care Scorpio, don't eviscerate your enemies only to harm friends and family, or more importantly yourself. Use this time to study and wait. Rise above your initial instinct to lash out and reach for compromise—it'll be well worth it. Practice self-care this month and maybe indulge, a little, in your desires. Remembering balance is the key.

Sagittarius (Nov. 22-Dec. 21)

Keep it steady this month. Try to keep a level head. The world is apt to drive you crazy. Your worst enemy is indecision in others and of course your reactions or over reactions. Work to maintain your health, but act as you must and trust in yourself.

Capricorn (Dec. 22-Jan. 19)

Madame G wishes you well this month Capricorn. Your stubborn nature is often like a Beta fish fighting with your own reflection. It's in your best interest to calm down and work against your nature. Your generous spirit will relish the friends you make for your efforts.

Aquarius (Jan. 20-Feb. 18)

You're luckier than you realize. Enjoy this time as fall steps in and takes over for summer. Libra's sun reflects kindly on your sign. The lunar eclipse worked in your favor, don't waste it. Live in the here and now and give thanks for what you have.

Pisces (Feb. 19-March 20)

Balance is hardest of all for you my friend. Your passionate nature encourages you to give your all to everything, but not all at once. This month you'll likely feel pulled in too many directions, with nothing left to give at the end. Trust yourself and learn to prioritize, saying no is not just for toddlers. In fact, it's a sign of maturity.
