

Aries (March 21-April 19)

Speed is the name of the game this month. You've got to get it all done now. But, your excellent skills are less important than charm. You've got charisma in bundles. Use it against those who put barriers in your path. As Mick Jagger said: "We all need someone we can bleed on." Attack! You've got this.

Taurus (April 20-May 20)

Your health requires attention. Exercise iron control and avoid leftover candy. Madame G believes in you. The pace picks up this month and requires more than you're willing to give in, at first. Don't give up. Use your best judgment. Relationships are delicate so treat your love with feather-light gloves. You'll be glad you did.

Gemini (May 21-June 20)

"Summertime and the livin's easy." Fall is in the air and winter is indeed, coming. Fortunate for you Gemini, Scorpio's influence is positive and powerful. You've enjoyed a fun and flirty time. Even your short skirts, crop tops, and flip-flops reflect the summer fun. You've got the spirit, so go ahead and use it.

Cancer (June 21-July 22)

No one doubts your intense focus this month. You were driven beyond, madness, greed, and ambition. Bless you, because it's been a trial for those who love you. Growth often requires pushing some people aside. It's harsh, but necessary. Break old patterns and reach out to those you love. If they care about you they'll reach back, if not — you tried. Carry on!

Leo (July 23-Aug. 22)

Hate is a strong word and you hate indecision and confusion. You're facing both issues now. If only your options weren't so tantalizing. But, choose you must. It won't kill you—at first. Follow your heart and listen to that gut. It's telling you to watch your health and activity level. Do your best. Go on and break those little hearts.

Virgo (Aug. 23-Sept. 22)

You're a leader in your own right and inspire those below you. Your smile brightens the lives of many. Life is good. But, dear Virgo be cautious and don't act arrogantly. You too must follow the basic rules of civility and gravity. Don't take unnecessary risk. NO DRINKING and DRIVING. It's lose-lose for everyone, if you do.

Libra (Sept. 23-Oct.22)

Balance is everything. Your creativity is best served writing your memoir, or teaching those in need, rather than hawking wares in a kiosk. As the sign of fashion and cool headedness, you're about to fall head-over-heels without conscious awareness. It'll surprise and shake-up your world. Congratulations! But, watch the PDA because no one wants to see you making out with your crush in the parking lot. Keep it fresh and classy.

Scorpio (Oct. 23-Nov. 21)

Irascible Scorpio, your jealousy is apparent only to you. Life is in your hands. As the Sun's representative of death and re-birth everyone relies on your wisdom and self-restraint. But, you're only human. It's okay to feel moments of impulsive regret or envy. Fear not it won't last. You've a talent for transformation and you won't covet for long. Instead you'll take it for yourself.

Sagittarius (Nov. 22-Dec. 21)

Don't take it personally Sagittarius. Plans fall through, but that doesn't mean your friends and family don't love you. They're busy too. Remember those times when your life wasn't your own. If a friend doesn't accept your offer for a hunting trip, don't sweat it. You didn't make their surprise birthday bash because you were busy. It could just be a coincidence they no longer want to hang out. Give them time to get back on track

Capricorn (Dec. 22-Jan. 19)

Tres chic! You're looking extra good this month. You've discovered a whole new wardrobe and you love it. There's a little extra pep in your step too. Use your creativity to make this the best month ever. It's important to follow those creative dreams and log your findings in a journal. Try an excel spreadsheet to organize your reality. It may help.

Aquarius (Jan. 20-Feb. 18)

The pressure is off and your well on your way to a new and exciting challenge. Creativity is overwhelming you, just go ahead and answer the call. Win this month by finishing one of a thousand activities, from a 50 thousand-word manuscript to choreographing a musical. Whatever it may be let your free spirit ride the waves of genius.

Pisces (Feb. 19-March 20)

Don't over analyze it Pisces. Sometimes, an invite is just an invite. You don't have to understand your blessings in order to experience them. If your daughter-in-law invites you to Thanksgiving dinner, say yes. She'll get stuck with the cooking and cleaning. Then you can lounge on the couch and leave whenever you want — it's a miracle.
