

Are you ready for some super full moon? This phenomenon is also known as a perigee and refers to the time when the moon is within 90 percent of its closest approach to Earth. On November 14, the moon will be closer to the Earth than it's been since January 25, 1948. In astrological terms this means "hang onto your butts." Madame G recommends whatever works.

Aries (March 21-April 19)

You may feel as if you're at a loss. Whether it's in relationships with friends and loved ones or co-workers, it's never easy letting go. Remember, each day is precious. What moments have you gained and lost? If you find that you're continually missing out, it might be time for change. Now is the time for digging deep and reflecting. You've got this!

Taurus (April 20-May 20)

Where are your priorities? You may find you're building a life you don't even want. If this is the case, it's time for reflection. If you're working towards a purpose that's deep and meaningful, then you'll be okay—Madame G has bad news if you're not. If you're unhappy with life only you can change it. Blame no one except yourself. Live free or die unhappy. The choice is yours.

Gemini (May 21-June 20)

The sun is in Scorpio. This is time for deep reflection and contemplation. No stone is left unturned. Shallow interactions are meaningless. You'll find that only great passions will do. This is true in life and love. If you're settling down, don't despair. This means a more profound journey awaits you. Deep in your soul—you're ready. Show no fear!

Cancer (June 21-July 22)

What's the value of life? You may wonder what your monetary value and worth are. It may be more than you think and it could be less. Check your ego at the door and take a cold hard look at yourself. Our lives are more important than cogs in a wheel. But don't let anyone rain on your parade. If you're a cog and you like it—that's okay. Make the choice and live it. Be you!

Leo (July 23-Aug. 22)

Our lives come and go in the blink of an eye. What are you grateful for? If you have trouble answering this question, take a moment to think. This should be an easy question. Don't despair. Look up and take charge of your actions. Make relationships with those around you. Life is lonely if you don't. Love the ones you're with, for they may be the best one for you.

Virgo (Aug. 23-Sept. 22)

Feeling lonely? Attempt understanding with the incomprehensible. Such as, a Scorpio may feel removed from yourself. They're a fixed water sign and it clashes with earth mutability. But there is goodness in everyone. They share qualities you covet and admire: passion and honesty. Go ahead, give it a try. Live like a Scorpio, for a day—it's harder than it looks. Try it. Be strong!

Libra (Sept. 23-Oct.22)

You have excellent qualities. They're perfect in every way, especially your eyes. Are you sure this is accurate? Perhaps you're seeing things from a flawed perspective. Maybe you're not so perfect. In fact, a good leader always supports his team while taking on a greater sense of responsibility. If you're still seeking approval—you're doing it wrong.

Scorpio (Oct. 23-Nov. 21)

How do you create a supervillain? Emotional intelligence is more important than institutional intelligence. With one you may prevent a war; the latter inevitably creates one. Take a few blows for the time being. You're closer to victory than you know. He who laughs last, laughs the loudest. You don't always need to beat your enemies, just outlast them.

Sagittarius (Nov. 22-Dec. 21)

The time for frivolity is over. Make like Harry Potter and pull out the cloak of invisibility. You may need to put your head down and work. This won't last forever. Make it work for now. You've got time on your side. Before you make a critical error: stop, drop, and roll. The fire may be hotter than you think. Don't panic. Just take the time to think. You've got this!

Capricorn (Dec. 22-Jan. 19)

Watching a loved one suffer is hard. Being the one to cause the suffering is worse. Watch your words, for they are the actions of the mouth. You may also want to watch your body language and consider your tone of voice. These subtle gestures do more damage than you think. They also reveal more than you want. It's up to you to show respect and love.

Aquarius (Jan. 20-Feb. 18)

Row, row, row your boat gently down the stream... Sometimes, it's best to go with the flow. At other times, you need to take a stand. What's better for you? If you're in need of a swift kick on the backside, or a good soak in the stream, head in your current direction. If you'd like a different action, well, you may need to do something else. Madame G suggests a life jacket.

Pisces (Feb. 19-March 20)

What else are friends for, except to sip mochas and discuss the viability of jumping rope with the small intestine? If you're not quite over your macabre fascination with Halloween, create a new tradition. Perhaps you're only willing to engage with the light. If so, you're missing out. The good only exists with the bad and light is equal to the dark. Live well!
