Welcome to another look at some of the highlights that will be arriving on Blu-ray, 4K Ultra HD and DVD. There is a big sequel appearing, as well as plenty of quirky independent titles. So, if you can't make it out to the movies this week or need to stay indoors for a few days, be sure to give one of these titles a try!

BIG NEW RELEASES!

DADDY DAUGHTER TRIP: A struggling inventor tries to make ends meet by donating blood and taking on odd jobs. Eventually, he and his wife end up having to reside with friends. Desperate to give his daughter the "Spring Break" trip of her dreams, he decides to plan a cost-effective vacation for the two of them that will still deliver on her biggest wishes.

This comedy hasn't been seen by many critics and the single review that has appeared online thus far is negative. The individual writes that while this is clearly a sweet pet project for the star and his real-life daughter, the end result features too many gags that miss the mark and the end product won't make an impression. For the time being, this is a DVD-only release.

The cast includes Rob Schneider, Miranda Scarlett Schneider, Jackie Sandler, Monica Huarte and John Cleese.

INDIANA JONES AND THE DIAL OF DESTINY: Returning to the big screen after a 15-year absence, the latest and final *Indiana Jones* adventure catches up with the archeologist in the late 1960s, now serving as a professor in New York City. When his goddaughter suddenly appears and asks about the location of an old relic

her father was obsessed with, the protagonist attempts to dissuade her from seeking it out. However, sinister forces soon appear looking for the item, and Jones is roped into another globe-trotting quest.

This follow-up received more decent reviews than pans, but it still ranked lower than all other films in the series. Roughly one-third of the press commented that it offered a less-effective mash-up of elements from previous entries and, as a whole, didn't feel necessary. Regardless, the consensus was that the opening sequence was phenomenal and that while the movie didn't match its predecessors, it provided enough thrills and laughs to earn a recommendation.

Harrison Ford, Phoebe Waller-Bridge, Antonio Banderas, Karen Allen, John Rhys-Davies, Shaunette Renee Wilson, Thomas Kretschmann, Toby Jones and Mads Mikkelsen headline the picture. There are multiple versions of this title being made available from 4K Ultra HD and Blu-ray to standalone Blu-ray in a variety of packaging, so be sure to read up on various editions before making a selection.

THE KILL ROOM: An art dealer comes into contact with a hitman and his boss. They all come up with an elaborate money laundering scheme that presents the assassin as a new Avant Garde artist. He unexpectedly becomes famous, leading to threats and double-crosses between the group as they try to navigate their unexpected public success.

Slightly more critics appreciated this effort than disliked it. Close to half commented that the writing was flat and uninteresting, saying that the movie didn't make the most of an intriguing setup. But more called the film a sharp and funny satire of the art world with some excellent performances that carried audiences through the predictable story elements.

This title will be available individually on 4K Ultra HD, Blu-ray and DVD. The cast includes Uma Thurman, Joe Manganiello, Samuel L. Jackson, Debi Mazar and Maya Hawke.

SRI ASIH: THE WARRIOR: Also known simply as *Sri Asih*, this Indonesian superhero film involves a youngster who was born during a volcanic eruption. Tragically, she is separated from her parents during the disaster and grows up alone with anger issues. The lead is later adopted by a wealthy woman who tries to give her a normal life and help her develop a unique set of skills. As she enters adulthood, the lead realizes she is no ordinary human and must decide what to do with her powers.

This foreign-language feature hasn't been seen by many in this part of the world, but those who have watched the title enjoyed it. They called it a slickly made, enjoyable and empowering superhero movie that contained plenty of well-staged fight scenes and thrills.

For the time being, this film is only available on DVD. It features Pevita Pearce, Ario Bayu, Christine Hakim and Jefri Nichol.

The new 4K transfer was taken from the original camera negative. The set includes a new commentary from a pair of podcasters and Stephen King experts. There's an isolated score and an audio interview with the composer, interviews with a supporting cast member, co-star Everett McGill and the editor. Additionally, it comes with a feature on the effects work and a ton of publicity materials.

Also getting an upgrade is *Stand by Me* (1986), a period coming-of-age drama/comedy based on a novella by Stephen King. This well-regarded effort from director Rob Reiner (
