

Welcome to another look at some of the highlights arriving on Blu-ray and 4K Ultra HD, as well as DVD. This is an incredibly busy week, with so many titles that a few micro-budgeted movies had to be cut from this article. Still, there's something for everyone, including documentary, drama and biopics, to genre flicks and science-fiction. So, if you can't make it out to the movies this week or need to stay indoors for a little while, be sure to give one of these features a try!

BIG NEW RELEASES!

BAD THINGS: A group of friends decide to take a vacation at a remote mountain resort. Since this is a horror movie, this kind of trip can only be a bad one. Friction arises between group members and, if that isn't enough, spirits of past guests begin terrorizing them. It isn't long before the ghosts and the friends begin attacking one another.

This picture debuted on the Shudder screening site and is now arriving as a DVD-only release. Reaction from the press was split. Almost half stated that the screenplay attempted to juggle too many elements and suffered from pacing issues as well as a weak finale. However, slightly more admired the film's attempts to alternate between traditional shocks and psychological horror, suggesting that enough of it worked to earn the movie a pass.

It features Gayle Rankin, Hari Nef, Annabelle Dexter Jones, Rad Pereira, Jared Abrahamson and Molly Ringwald.
