

On May 15, the New Moon emerges in Taurus. This is an excellent time to set lofty New Moon goals. As you know, this is generally a time to reflect and wind down before we gear back up for another cycle. Madame G recommends that you take a look at where you are. Pull out a pen and pad of paper. Don't make things worse than they are, but "spring cleaning" is in order. GO!

Aries (March 21-April 19)

What's one thing you'd change about the past three months? Instead of making BIG life-altering changes all at once, consider slowing down and taking each day as it comes. You may have noticed that you spent too much money over the last three months, or maybe you didn't focus enough. Now, how would you like to see the next three months go? Make the necessary changes. Do it!

Taurus (April 20-May 20)

"Don't wish life were easier—wish you were better," said Jim Rohn. It may seem like you will never get ahead, but you will. You have all the bits and pieces necessary to get where you'd like to go. Instead of focusing on what didn't work, start focusing on what you can change and progress forward. It's easy to get stuck. It's difficult to move upward and onward. Keep going!

Gemini (May 21-June 20)

One more step and you're there (maybe). It's easy to be enthusiastic at the beginning of a project. It's harder to maintain enthusiasm as time wears on. Stop focusing on the elements that you can't change. Put your energy and focus into the right things and you'll come out on top. You can't control the stars or those around you. But, you're in complete control of you.

Cancer (June 21-July 22)

Well, ain't that just how the cookie crumbles. It may seem like a setback, but is it? You're the guiding light when it comes to your own life. Make the choice that seems best at the time and move on. You can't stay stuck in the past and hope your future will improve. The world and universe waits for no man or woman to come to terms with their existence. It just is.

Leo (July 23-Aug. 22)

The Buddha said: "the human condition is like that of a person shot with an arrow. It's both painful and urgent." Often times we get stuck thinking about the things that don't really matter. If you really think about it, the most important thing that any human being can do is appreciate the here and now of their existence. Don't get stuck worrying about the wrong things. Breathe!

Virgo (Aug. 23-Sept. 22)

It's an exacting time. You may feel the need to be extra special and nit-picky. It's okay. We all know you're picky! WE love you anyway. Instead of making yourself (and those around you) stark raving mad, consider the letting go approach. Quality work will always be in vogue, but at what cost are you willing to sell yourself? Sometimes good enough is great!

Libra (Sept. 23-Oct.22)

The next few weeks are bound to be a doozy! Instead of forcing something to happen, consider taking a step back. It's important to reflect on strategy and purpose. You can continue to lead the charge and push forward like the badass Superwoman you are, but slow down and care for yourself. This is the best you can do for yourself and others. Now is the time for fun. Let it go!

Scorpio (Oct. 23-Nov. 21)

Live free dear Scorpio! Now is the time to put in the focus and work towards your future. Don't get stuck. Take care of yourself. Learn all you can. Take as many classes as you can and start sharpening your skills. Once you're done, you'll be the sharpest arrow ready to shoot off far into the distance with a resounding, THUD! And bullseye. You're going places. Take time to chill.

Sagittarius (Nov. 22-Dec. 21)

You've made it this far, will you keep going? Only you know if the life you're living is worth fighting for. You can make the changes necessary to live the life you've always wanted. Don't keep focusing on the things that you can't change. You're only alive on this planet for a short time. Don't waste it being something else for someone else. GO!

Capricorn (Dec. 22-Jan. 19)

What's in a name? Well, as the keeper of all things you should know. But, if you don't have the answer, don't freak out. People probably expect much less of you than you think they do. Martyrdom is for the birds. Instead work on clear boundaries. Show compassion and strength when you feel burdened by others. But, remember you have a choice to walk away.

Aquarius (Jan. 20-Feb. 18)

Will this work? You can't always have an exact and perfect answer to life's questions. You can keep trying to accomplish your goals and live the life you've always dreamed of or do something else. Believe it or not, the choice is always within you. Don't let the negative odors of those around you get you down. Stand strong among those who would shun you for being you. Smile.

Don't be a herd of stray cats wandering aimlessly looking for free food. You can do better than that. Life is not always what we want it to be, but we often make the messes that we need to clean up. It's good to live it up on the weekends, but you can't just keep working towards those two days. Start living a life that makes you a little bit happy everyday, not just Saturday.
