

Change isn't easy. Sometimes, our darkest hour can be a moment of clarity and understanding. Do not wait quietly by the corner and allow life to happen. Take life by the horns and hang on. You may get a little bruised, but what a wonderful ride it will be. Good luck! Madame G wishes you a very Happy New Year! May 2020 be the year you fulfill your dreams. Live well.

Aries (March 21-April 19)

Now is the time to try something new. Life is a continual process of rebirth and renewal. You can't only accept the good. In a cycle of life, there is also death. This takes many forms. When you look back at your life, you'll notice that the best times likely followed a time of great sorrow. Don't fret over the changes that look like an ending. It may just be the beginning.

Taurus (April 20-May 20)

How do you cope with stress? No one is as immune as they seem. Everyone is bothered by the little things, but by how much, is an important consideration. You're more than your emotions. Your actions do speak louder than words. In the end, stop talking about what you believe and start showing people exactly what you believe by being what you believe. Do or do not.

Gemini (May 21-June 20)

Only you know the answer that your heart seeks. Be honest. You don't need to convey your truths to anyone except yourself. Your honesty with yourself should only be about you. Learn to rely on your opinion without the opinion of others. This doesn't mean that you can't appreciate what others have to say, but don't discount what you think just because others don't agree.

Cancer (June 21-July 22)

Your life is a rich and wonderful journey. You have made the right steps towards greatness and you're working toward the next step. Set some lofty resolutions for the coming year, share them with friends, and get serious about holding each other accountable. Enjoy what you have with those around you.

Leo (July 23-Aug. 22)

Take this New Year to become the lion you have always seen yourself as. Wash away bad habits and realize true potential. Mend old fences with the loved ones you have pushed away. Announce your intentions in front of other people. It can strengthen your intentions and put you "on the hook" to live up to them.

Virgo (Aug. 23-Sept. 22)

Life is not as hard or difficult as you imagine. We often make it worse than it is. That doesn't mean that bad things don't happen. They do. You have a right to be mad, angry, and sad. But, remember that some of it feels worse than it is, because you're making it worse than it is. Do your best and keep moving forward.

Libra (Sept. 23-Oct.22)

Look up and move forward with confidence. The world is not always as it seems. Sometimes harder times are just around the corner, only to be followed by the best periods of your life. Don't give up just because it's difficult. This is an opportunity to build some new or strengthen some existing coalitions, including with siblings. Live well and with purpose.

Scorpio (Oct. 23-Nov. 21)

Keep going, strong and noble Scorpio. This year let even less bother you. The change of direction you are looking for involves vision, belt-tightening and perhaps seeking new sources of

revenue. Work hard, but only in the right directions and for the right people. Your gratitude is a loyal asset, continue to show it for those who show it to you.

Sagittarius (Nov. 22-Dec. 21)

Good luck Sagittarius, you're an amazing apprentice on a wild ride. Feel no need to rush into 2020. Your New Year gets off to a tranquil start. Beat the January hordes and get a jump-start on any and all home renovations now, while your determination is high. Now is the time to keep trying and starting over. You will renew and you will come back around.

Capricorn (Dec. 22-Jan. 19)

Don't forget to take care of yourself. You deserve happiness and peace just like everyone else. Let your thoughts drift to the high points of the previous 12 months, as well as new initiatives on the horizon. Maybe now is the time to let someone else take charge. It's okay to let a few things of unimportance slide. You are well on your way.

Aquarius (Jan. 20-Feb. 18)

Believe in your dreams. You are who you are meant to be. Keep your eyes looking forward and agree to help those around you. Develop a strong plan for yourself. Write out all the elements that would make you happy, and don't worry about it being "realistic." Visualizing and desiring are the first, most important steps to manifesting something. You can accomplish anything that you put your mind to.

Pisces (Feb. 19-March 20)

You might need to adjust to your life of solitude, but it might be only punishment for past transgressions. Even if there's nothing to show at the moment, set some specific dates for whatever's next. Start the New Year right and begin to see other points of view. Accept that
