

Aries (March 21-April 19)

This week dear Aries, you have several forces working against you. Good thing, you're always up for the challenge. Instead of backing down or retreating, your spirit soars with each antagonizing step. The result is beneficial. You gain where others crash and burn. Take that extra step and try something new. It's hard work, but worth it. Try a dash of parmesan on your eggs.

Taurus (April 20-May 20)

Last month pushed on your last nerve, but this week looks brighter. Although, you'll not experience the over abundance of positive energy like Aries, you'll not see too much negativity either. This is a wonderfully neutral time for you. G suggests allowing the moon to give you strength, and rest while you can, but don't take a siesta at your desk.

Gemini (May 21-June 20)

Madame G sees positive energy flowing out of the universe for you Gemini. You'll feel revitalized this week, and for most of the month of October. But, don't be overly hasty to make life decisions. This is the best time to solve those small, or even minor issues, that pop up. Fortune favors the brave. Go deep sea fishing, but get advice on hooking the bait ... spare those fingers.

Cancer (June 21-July 22)

Madame G predicts this is the week for making friends and allies. Your energy is lower due to Mars and Saturn. These aspects are ready to cause problems and wreak havoc on your peace of mind. Work towards balance. Use your best judgment and look ahead. You may not want to start new projects, but if you do, your friends are there to help, except when it comes to patching holes in walls.

Leo (July 23-Aug. 22)

Mercury caused the fall of Leo, so you'll feel the drain on your energy. G here believes you'll do just fine. The Sun and leader of your sign shares its strength with you. You have glory and shining achievements in store for you. You'll experience some negative feedback from Saturn. But, you'll win over the heart of the stingiest critic.

Virgo (Aug. 23-Sept. 22)

October is sure to be an ambitions time. Everyone appreciates your earthy qualities. You'll appreciate a calm week. Pay special attention to your mind. Avoid stagnation. Attempt a new art project or read a new book. Walk the dog everyday and enjoy some healthy exercise and meditation. You'll need it.

Libra (Sept. 23-Oct.22)

You are by far the most well balanced of the signs. But, you'll likely experience a few out of whack moments this week. Saturn isn't helping. Keep that in mind, as you duck punches, and feel less than generous this week towards coworkers and loved ones. Everyone seems to take more than you can give. Mars will revitalize you this week, with added passion and vigor. Get out there and have some fun, blow off all that excess steam.

Scorpio (Oct. 23-Nov. 21)

Madame G sympathizes with Scorpio. Your deep waters are misinterpreted and emotions are always strong. You'll experience an oddity this week, and empathize with the balanced Libra, by taking on the role of mediator. With Mars, Saturn, and the Sun in your corner how can you fail? You'll not have your usual devastating energy, but you'll experience peace of mind.

Sagittarius (Nov. 22-Dec. 21)

Madame G expects great things from you this week. Can you handle it? The expectations of others have never bothered you and they don't now. Stand firm as the leader of your destiny. Don't let past loves, or lives, interfere with the here and now. Take charge and you will reach your goals.

Capricorn (Dec. 22-Jan. 19)

This week is busy Capricorn. Small items add up to outlandish proportions, if left untreated. Saturn is out of sync and you'll feel more emotionally vulnerable, especially with loved ones. You have the strength and will to handle any situation and a little vulnerability can be a good thing. Try giving a hug. I know it's difficult for you, but you'll feel better.

Aquarius (Jan. 20-Feb. 18)

Expect a rather crazy week Aquarius. Most of the energy is positive and you'll see the fruits of all your efforts. With any upcoming challenges, flip them into a positive. You have the foresight and skill. Use good sense and that upbeat attitude to your advantage. Madame G salutes you. Just don't go crazy on girls night out.

Pisces (Feb. 19-March 20)

You're feeling great this month and you should. Everything is going your way. Life may throw you bumps and jumps. Someone may even throw all your clean clothes on the lawn, but it doesn't matter – you're happy. Support is in the air. You feel positive energy from every direction, if from no one in particular. Swim with confidence.
