

According to the Farmers Almanac, The Buck or Thunderstorm Full Moon occurred on July 20. This marks the growth of new antlers on young male elk and a few more thunderstorms in the sky. You may experience a variety of new events that signify milestones of growth in the midst of summer storms. This may be equally terrifying and exciting. Madame G suggests putting on your rain-gear and heading out. You've got this!

Aries (March 21-April 19)

You may experience a few discomforting challenges this week. Are they an annoyance because they're new or difficult? Only you can decide what's best for you. Consider that others in the world have also experienced this and may provide some much needed counsel. If not, pick up a good book and enjoy your free time. Good luck!

Taurus (April 20-May 20)

You think you know what's wrong, but you probably don't. It's best not to pretend to have mental powers. You can't read the minds of other people, so don't try. Ask the person or persons in question to express themselves using plain language. Express yourself in the same way. Be honest. Be kind. And you'll experience growth and peace.

Gemini (May 21-June 20)

Smile; everything is going to be all right! It may feel overwhelmingly dull at first, but appearances are deceiving. It's not always a good idea to judge others harshly without first learning all the facts. Judge carefully. Do your best to be a wise friend and loving daughter (or son). But you may overstep both if your opinions are too harshly spoken. Always be kind.

Cancer (June 21-July 22)

What goes up must come down — are you ready? Sometimes, you let your anger get the better of you. Consider toning it down for more than just friends and family. It may hurt your professional life as well. Remember that when you shoot a gun into the air, the bullet must come down somewhere. Where? Well, that depends. Madame G suggests caring for your friends and family. It's wise to not remain too self absorbed. Show mercy!

Leo (July 23-Aug. 22)

You're enjoying the weather? How about spending time with friends and family? It's such a joy to do what you love. Be grateful. You've earned every bit of what you've made and done. You should be proud. But no one gets to the top alone. Don't forget that even if it's in the smallest and most insignificant way, someone helped you — thank them for the help and remain humble!

Virgo (Aug. 23-Sept. 22)

You make a mean martini or at least a tasty cheese-and-tortilla sandwich. You've got a real talent for creating delicious things, whether it's art, food, or a finely executed business transaction. Whatever you do — you do it well. Congratulations! However, when you find that everything is too easy, stop! Take a look around. Are you growing and getting better? If you are, then is now a good time to move? What do you define as success? Do your best!

Libra (Sept. 23-Oct.22)

You're thinking some very deep and serious thoughts. They may make you uncomfortable. Lean into the discomfort and follow their trail. You don't have to fully understand them or fear them, just listen. Hear your own thoughts and evaluate them. Don't dismiss them or call them names. Provide a safe haven for thought in your own space. You'll be amazed at what you learn. Have fun!

Scorpio (Oct. 23-Nov. 21)

You're probably thinking that you want a break! But it probably feels like things are spinning out of control. It's okay. Remember that feelings, though valid, are not always a representative of the truth. You may be experiencing growth and that's not always comfortable. Face the hard truths and then let go of regret, sadness, and pain. Moving toward your goals is not a straightforward process — it's a struggle, but you'll win.

Sagittarius (Nov. 22-Dec. 21)

So much to do and so little time, you may feel like life is wearing you down. Your mind is probably stretched a little thin and your nerves are shot. Don't dwell in this state because it's detrimental to your self-esteem. Take charge of your life. What does success mean to you? How will you achieve your own happiness? Live long and prosper. Life is an adventure of our own making.

Capricorn (Dec. 22-Jan. 19)

The winds they are changing for you. You may be close to retirement or moving. Whatever the case, don't just sit back and let someone else carry the whole burden; help. They need more than a smile and a thumbs-up. You may need to shoulder a larger share of the burden and risk. If you don't, then you may lose the one person who cares. Madame G suggests you not take your family for granted.

Aquarius (Jan. 20-Feb. 18)

Life is an odd assortment of trial and error, and luck. You have all of the above. Trust yourself to succeed. You've planned and plotted, but now is the time for action. You may think that life will work out without effort or focus, but that's rarely true. You must steer your ship in the direction of your dreams or risk never reaching them. Don't wait around forever.

Pisces (Feb. 19-March 20)

You're life is beautiful. No matter what happens in the world, focus on the beautiful things in front of you. Don't take your grandkids, nephews, or friends for granted. Show love in an open and giving way. Be free with this affection. Shout it to the hills. Then do the most selfless act you can imagine for them, without asking for recognition. Give freely without the possibility of return, and you'll experience pure joy.
